

Swinging Picture Frame

This self-standing picture frame has a clear, acrylic photo sleeve that hangs from pins and can display two 4"x6" photos, one facing forward, the other facing the back. It is shown here with a 3"x5" photo. (Figure 1)

Figure 1

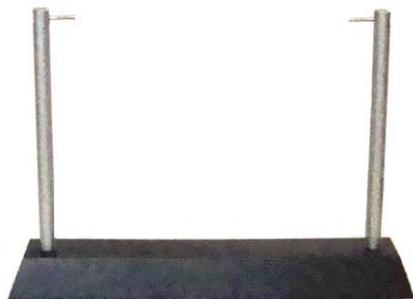

Figure 2

The 7"x1"x1" frame has two parts: the base and the picture sleeve.

The black wooden base has 4" silver-toned posts on each end, both of which have thin, 1/2" perpendicular pins at the top. (Figure 2)

The picture sleeve is a thin acrylic rectangle folded in half lengthwise to create a 4"x6" sleeve that hangs on the pins and swings freely.

The pictures are inserted in the sleeve as shown in Figure 3. Because the sleeve is clear on both sides, two pictures can be displayed if desired.
